WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut from 6 mm PVC foam board: base 510 x 560; two sides 510 x 238; two ends 548 x 238. Ends fit between the sides; all stand on the base.

Outdoor end: two 160 x 180 openings centred 185 left and right, from 24 to 204 up from its bottom edge; a 14 hole 40 left, 16 up.

Room end: a 220 x 190 opening from 30 to 250 left, 24 to 214 up; holes 6 and 12 at 150 and 170 right, 199 up (light and button).

Right side: a 12 hole 50 from the room end, 194 up (power gland).

Base: four 5.5 holes, 140 and 440 from the outdoor edge, 175 each side.

Battens 10 x 10: four uprights 238; two 478 under the sides; two 528 under the ends. Glue every joint with PVC cement and screw each board into the batten behind it, 3.5 x 16 screws at 80 centres.

Check: square within 1 mm on the diagonals; openings line up with the collar and grille positions on the other sketches.
