WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Board 510 x 560 x 6 mm. Opening 70 x 220 for the supply grille, 420 to 490 from the outdoor edge, 40 to 260 right of centre.

Lining plug: 10 mm foam, 476 x 526, glued centred under the board so it drops inside the wall lining with 1 mm all round; cut the same 70 x 220 opening through it.

Foam blocks glued under the plug (they hold the core and filters):
core hold-down 306 long x 168 wide x 24 deep, over the core;
supply filter block 34 x 138 x 28 at the outdoor end, right;
exhaust filter block 21 x 200 x 18 at the room end, left.

Latch keepers: one each side, 118 to 142 from the outdoor edge.

Check: the lid drops on with the plug inside the walls and the latches pull it down evenly onto the gasket tape.

BREATHEBOX
