WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Three pieces of 3 mm PVC foam board, all 218 tall, on the centre line.

Outdoor-end divider: 51 long, plus a tongue 3 long x 174 tall, 20 up from the bottom, that reaches through the frame's U to the core face (drawn left).

Core-side divider: 37 long plus the same tongue (drawn middle).

Room-side divider: 78 long, plain (drawn right).

Fit: each stands on the floor lining, glued to the frame, bulkhead or end lining it meets; the tongue's end just touches the core.

The dividers split each end of the box into supply (right) and exhaust (left), so the two air streams never meet.

Check: no daylight past any divider edge with the core in.

BREATHEBOX
