WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Exhaust grille (room face, drawn): 240 wide x 210 tall, 21 slots

4 wide x 170 long at 10 centres. Supply grille (lid): 90 x 240,

6 slots 4 wide x 200 long at 10 centres.

Or buy perforated aluminium sheet with holes no larger than 5 mm and cut it to the same sizes.

Drill a 4.5 hole 6 in from each corner; deburr every edge.

Fit: each grille covers its opening with 10 to spare all round, held by four M4 bolts with nuts inside the box.

The grilles keep fingers off the fans: no opening wider than 5.

Check: a pencil cannot pass through any slot.

BREATHEBOX

github.com/BoujeeEnjinia1701/breathebox

BreatheBox grilles (2): making sketch
